Powerful Energy Healing

When our energetic vibration decreases, dis-ease can occur on mental, physical, emotional, and spiritual levels. Energy therapies return higher frequencies to the human energetic system to promote wellness.

“Illness always comes with a message. Many illnesses are caused by trapped emotions. Release your emotions and you will release your illness.” Derek O’Neill

The Rising Star is an extraordinarily powerful system sourced from an ancient Tibetan lineage. It works by directing energy through the chakra system, working on the five elements; fire, water, air, earth and ether, so that your entire being can start to balance and heal.

A single treatment starts to raise the vibration of the human energy field, clearing the chakra and auric system for 21 days, as it moves through the 7 energy points (chakras) three times. For optimal results, three sessions are recommended three weeks apart. Each session promotes deeper relaxation, allowing the mind to let go, so deeper issues can be addressed.
